

1. Executive Summary & Core Value Engines

HiyaGhar is an omni-channel D2C platform delivering authentic artisanal delicacies, traditional mukhwas, handmade wellness products, and personalized gift hampers across India.

The system unites two synchronized operational engines:

- Customer Experience Engine (Storefront):** Lightning-fast, mobile-first shopping with custom combo builders, occasion gift hampers, and instant checkout.
- Governance & Operations Engine (Admin Portal):** Role-based admin access, real-time inventory control, coupon discount rules, order lifecycle tracking, and financial analytics.

2. End-to-End Customer Journey

STEP 1

Discovery & Customization

Customer browses collections, builds mix-and-match combos, or chooses occasion gift hampers.

STEP 2

Smart Cart & Checkout

Applies coupons with min-order checks, verifies free shipping bar, inputs delivery address.

STEP 3

Payment & Confirmation

Secure online payment (Gateway / UPI) or COD with instant order tracking creation.

STEP 4

Fulfillment & Tracking

Live step-by-step order progress timeline: Placed → Shipped → Delivered.

3. Order-to-Fulfillment Lifecycle (Operations)

Lifecycle Stage	Responsible Team	Automated System Action & Impact
1. Placed	Customer / Automated	Inventory stock reserved; Order ID, item snapshot, and discount breakdown saved.
2. Confirmed & Packed	Warehouse Operator	Item packing slip and branded GST invoice generated; items securely boxed.
3. Shipped	Logistics / Courier	Courier AWB tracking number assigned; live tracking updates activated.
4. Out for Delivery	Local Courier Hub	Last-mile delivery dispatch notification sent to customer.
5. Delivered	Customer / Courier	Status completed; customer loyalty reward points credited automatically.

4. Enterprise Admin Governance & Controls

Governance Area	System Features & Controls	Business Value
Catalog & SKUs	Product management, variants, categories, and image upload.	Complete control over pricing, packaging sizes, and availability.
Promotions & Coupons	% vs Flat discounts, first-order validation, max usage limits, min order thresholds.	Protects profit margins while boosting customer acquisition and average order value.
Stock & Warehouse	Real-time inventory levels, low-stock threshold alerts, category filters.	Prevents overselling and eliminates out-of-stock delivery delays.
Security & Roles (RBAC)	Super Admin, Store Manager, and Support Staff permission levels.	Ensures auditability, data privacy, and role-based operational safety.

5. Technology Stack & Enterprise Quality Assurance

Architecture Stack:

- **Frontend Web & Mobile App:** React 18, TypeScript, Vite, Custom Pure CSS Design System (Zero UI Library bloat for sub-second mobile page loads).
- **Backend REST API:** ASP.NET Core 8 Web API with JWT Role-Based Authorization.
- **Automated Quality Assurance:** Playwright End-to-End E2E test suites with comprehensive 38-case test matrix validating all business rules.

6. Strategic Executive Growth Roadmap

Phase / Quarter	Key Strategic Initiative	Expected Business Outcome
Phase 1 (Completed)	Core D2C Storefront, Admin Portal, Responsive Mobile Layout, and E2E Test Suite.	Robust foundation with 100% test coverage.
Phase 2 (Immediate)	WhatsApp Order Status & Delivery Alerts API Integration.	Decreases customer support tickets by up to 40%.
Phase 2 (Immediate)	Courier Shipping API (Shiprocket / Bluedart automated label generation).	Reduces dispatch processing time from hours to minutes.
Phase 3 (Scale)	Tiered VIP Loyalty Club & Gamified Rewards on Checkout.	Increases repeat customer purchase rate and Lifetime Value (LTV).
